

# Kapro B95 I

## Roast Beef

### Functional in brine:

**Kapro B95 I** is a beef collagen in fine powder form, based on 100% natural ingredients, displaying exceptionally powerful water-binding and emulsifying properties, both after heating and without heating. Due to the powder's fine structure, **Kapro B95 I** is extremely suitable for applications in brine.

### Classic Pulled Beef, produced in a modern way:

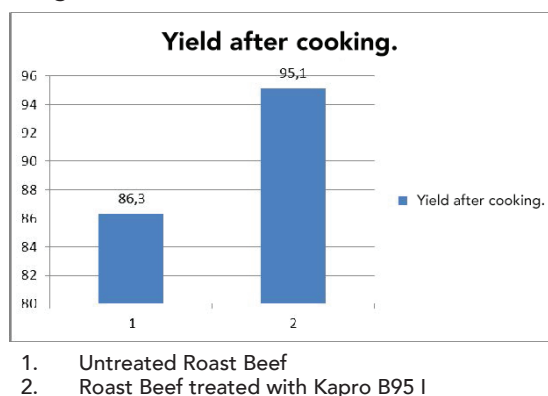

In injected products such as Roast Beef, **Kapro B95 I** gives a strong water binding, improving brine retention in the product. This will result in less dripping loss, at the same time considerably improving the quality. **Kapro B95 I** delivers a considerable cost reduction as the protein is highly functional, both unheated and when heated.

### Easy processing:

Due to its fine structure, **Kapro B95 I** is extremely suitable for applications in brine. The brine must be kept at a low temperature during the injection process (below 5 °C is ideal). Due to its high functionality, 5 to 7 kg of **Kapro B95 I** per 100 litres of water will absolutely suffice.

### The result:

- A major improvement to the recipe's economic yield, due to its high functionality.
- A considerable improvement in the structure as well as the product's bite.
- Significant reduction of the cooking loss, thereby increasing the juiciness.
- Clean label declaration. **Kapro B95 I** is animal in origin and has no E-number.

**DCP Ingredients** is an international producer and marketer of highly functional collagen proteins for the food industry
